📍 Still Bay, Western Cape 6674

PROFILE

I am a thoughtful and analytical Software Engineering student with a strong curiosity and a passion for coding challenges. I naturally observe and listen before making decisions, understanding how people think and communicate, which allows me to take informed leadership and collaborate effectively. I approach problems carefully, questioning assumptions and researching thoroughly, ensuring solutions are logical and well-considered. I enjoy exploring new ideas, learning continuously, and applying my problem-solving skills in both technical and real-world contexts.

WORK EXPERIENCE

Fogging amazings, 12/2024 – 01/2025

Seasonal Sales & Product Support Assistant

- Assisted customers with purchases, repaired and maintained devices, and supported branch operations during peak season.

Fogging amazing, Branch manager 10/2022 – 01/2024

- At Fogging Amazing, I handled a variety of tasks, including sales, creating product logos using Canva, and making videos for social media.
- I was also responsible for maintaining equipment, cleaning the store, uploading products to the website, and managing store credit for online purchases.
- Additionally, I assisted with courier tasks and ensured smooth store operations.

Inverroch Distillery, Still Bay, 12/2021 – 01/2022

Seasonal work - General worker

- At Inverroch Distillery, I was responsible for bartending, addressing customer issues, and directly marketing our products. My duties also included working on tills, waitering, presenting product tastings to clients, and handling various back-of-house tasks to maintain efficient operations.

Stables Eatery & Bar, Seasonal Restaurant Assistant 12/2020 – 01/2021

- Assisted customers with orders, served food and beverages, maintained a clean and organized dining area, and supported the team during busy periods.

Stilnetworks 04/2020 – 06/2020

- At Stilnetworks, I was responsible for sales of computer products, books, and handling repairs for printers and laptops/PCs. Additionally, I managed printing services and created business cards for clients.

EDUCATION

BELGIUM CAMPUS ITVERSITY, Bachelor of Computing

2024 – Ongoing

TECHNICAL / HARD SKILLS

- **Programming Languages:** C#, JavaScript, Python, Java, SQL
- **Frontend Development:** HTML, CSS, JavaScript, Angular,
- **Backend & API Development:** Node.js, Express.js, ASP.NET & Core Web API, REST APIs
- **Software Development:** Object-Oriented Programming (OOP), CRUD Operations, MVC Concepts, Agile Methodology, Layered Architecture
- **Database Management:** MongoDB, Mongoose, SQL Server, MySQL, SQLite, Entity Framework Core
- **Data Structures & Algorithms:** Problem-solving, optimization, and efficient data handling
- **Version Control & Collaboration:** Git, GitHub
- **Debugging & Testing:** Unit testing, error handling, troubleshooting, and manual API testing

SOFT SKILLS

- **Analytical Thinking:** Breaking complex problems into manageable parts
- **Logical Decision-Making:** Choosing solutions based on reasoning and data
- **Teamwork & Collaboration:** Working effectively in group projects
- **Time Management:** Balancing coursework, assignments, and projects
- **Research & Curiosity:** Investigating new topics, questioning assumptions, continuous learning
- **Communication:** Explaining technical ideas clearly to peers and non-technical audiences

ABOUT ME / INTERESTS

I'm a big fan of games — from chess to board games, and even video games. I love playing both for fun and competitively, always aiming to win, or at least making sure nobody else sneaks the win! People often think I'm quiet when they first meet me, but I'm usually just observing and listening before jumping in. I enjoy strategy, thinking ahead, and figuring out creative ways to solve challenges — whether on a game board or in real life.
